

**ESPA**

Software Development Internship_Life Sciences Team

(PHISLS2106)

Apply here

Start date

Flexible

Duration

6 months

Languages

Good spoken and written English levels are required (B2 onwards)

Location

Belfast, Northern Ireland

Belfast is the capital city of Northern Ireland and over recent years has seen a period of significant regeneration and growth. The birthplace of the Titanic, this vibrant city has a buzzing nightlife and social scene with many cultural events taking place throughout the year. Close to beautiful countryside and the famous Giant's Causeway, Belfast has something to suit all tastes.

Are you eligible to participate in the Erasmus+ programme?

Benefits

See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

The Host Company

The host company is a market leader in digital pathology workflow software, serving over 40,000 users worldwide. Established in 2004, they have specialised in using image analysis of tissue scans to identify cancers at early stages. This innovative Digital Pathology is aimed at reducing the workload of Pathologists by allowing for fast, accurate diagnosis and grading of tumours, so that correct treatments can be put in place as soon as possible. Recently acquired by a world leading electrical giant with a strong focus on healthcare, these are exciting times for the host.

Role

This is a great opportunity for a keen Computer Scientist who wants to gain practical experience in software development for this world leader in Digital Pathology. Mentored throughout, you will assist the Life Sciences Team in the integration and development of key software products. This internship will be a great addition to your CV and boost to your career prospects, along with the satisfaction of knowing that you will be contributing to medical research.

Tasks

- Working as part of a team to build software applications from initial specification to final deployment and acceptance
- Building web applications to support algorithm portfolio
- Automating tests using testing tools and scripts
- Rapid prototyping of new ideas
- Functional, performance and stress testing of the product
- Manual testing of the product.

Personal Skills

Essential:

- Background in Computer Science or a related discipline
- Experience in at least one OOP language, preferably C# or Java
- Good problem solver
- Knowledge of .Net

Desirable:

- Knowledge of the agile programming methodology and a continuous integration development environment
- Experience with .NetCore
- Experience with Angular
- Experience with Typescript
- Experience of writing and building unit and integration tests.
